LEITZ

LEICAFLEX SL : for excellent photography

Paralleling the Leica with its world famous coupled range-view finder system, the LEICAFLEX offers the same precision, reliability and optical excellence in the single-lens reflex Camera field.

The new LEICAFLEX SL combines the simplicity of integrated light measurement, which has limitations with high-contrast subjects, with the additional advantage of selective area reading for greater personal pictorial control. This combination of the two principal brightness measuring methods is just as important to the thoughtful amateur photographer as to the skill working professional. Both benefit from the simplicity, accuracy and speed of the SL system that lets you measure what you want, and always tells you what you are measuring.

foreword

On the eve of this magnificent occasion of 2nd International Colour Salon let me allow to extend my warm welcome to you all.

We will now present before you the 2nd International Colour Slide Exhibition. Before this exhibition I want to steal a few moments and will say something about the hurdles and hindrances we have to cross over. In this colourful spring evening I must recollect Ersi Poston's saying "There is no colour to poverty, it is all deadly grey and bleak. That's why the poor will always reach for anything bright, loud and colourful. To the destitute, colour means life." This instinct enlivens us. The crave of colour and the urge to show and see outstanding colour composition of eminent artist-photographers round the world drag us this year too to organise this 2nd International Colour Salon inspite of innumerable odds. I expect all of you will enjoy the colourful works of distinguished photographers from various parts of the world.

This year we have received numerous response from all over the world. But it is a matter of regret that the quality of the Indian entrants are not at par of the international talents. I presume that due to rarity of materials and the far reaching value of photographic goods, extensive experiment and exhaustive research work in colour photography are not being developed upto the mark. However, to encourage the Indian talents our Salon Committee took a late decision of a special cash prize of Rs. 100/- for the best Indian entrant.

Our panel of judges adopted a most modern method of selecting the slides by abstaining the choice from one judge to another which system of selection, we believe, makes a true reproduction of judges view on each slide. In this connection it is needless to mention that this Salon has strictly followed the P.S.A. and F.I.P. recommendation practice.

I am grateful to Messrs. B. K. Sinha, Benu Sen, A.R.P.S., E.F.I.A.P. and Subrato Ray, A.R.P.S., E.F.I.A.P. for their valuable task they have taken in selecting the slides.

I wish to renew our thanks to the entrants, donors, patrons, advertisers, press and the authority of Howrah Medical Club.

Lastly but not least, I thank the Salon Committee and general members whose ceaseless endeavours and tireless efforts have lifted this Salon such a stage of success.

Gobinda Chandra China

President

March 7, 1970.

Tread softly

for beneath the steps of this Mosque at Murshidabad lies Murshid Quli Khan in eternal peace! The Nawab of Bengal. An upright king who killed his own son for the sake of justice,—a generous ruler under whom Bengal enjoyed rare peace and prosperity. He longed to be buried under the staircase of the Mosque to be blessed with the dust of holy and pious feet.

Not only Khatra Mosque but also many other monuments of Murshidabad are full of our majestic past. The finest silk sarees and the exquisite ivory work of

the place still bear testimony to our rich and exalted past. Come to Murshidabad and stay at the new Tourist Lodge at Berhampore just ten miles away. And a whole world of sights and memories will be yours.

For reservations of luxury or economy accommodation at the Lodge contact the Manager or

CALCUTTA 5

Most people think that Kodak is snapshots

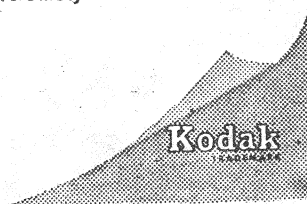

in a family album

It is. And more.

Today Kodak helps motion picture studios
to entertain and inform
radiologists to combat disease
teachers to instruct
business men to copy documents and
file them in miniature form
industrialists to speed production and ensure safety
policemen to detect and prevent crime
printers to get sharper images
scientists to record phenomena too faint
or fast for the eye to follow
astronauts to discover new worlds;
now let Kodak help you discover yours
