Fenner

Power Transmission

Equipment serves Indian Industries

Fenners offer the right drive for Your application

Whether it is a matter of starting, stopping, idling, overloading or operating frequency, consult Fenners.

Fenners, with their team of qualified technologists are in constant touch with their customers—advising them on the varied aspects of Drive designs—from V Belts to couplings and clutches, variable speed drives and flat belt drives.

Fenner service does not end by merely selling, but it is backed by a continuous after sales service.

The new brahmins

Many things are happening in India today. All centre around change. Modern technology has widened the frontiers of our consciousness. New and daring ideas have set the pace for industrial development.

At GKW, we translate these ideas into steel. New steels are developed and precision components produced to meet the critical needs of priority sectors of the economy. We have been at this for fifty years. Since those days when horse-drawn carriages were a familiar sight in Calcutta.

Over these years we have directed our efforts at the needs of the country and tried to fulfil our responsibilities as a corporate citizen. In the process, technology has multiplied. And a new breed of professionals has come to stay. These are the new brahmins : a class by themselves.

foreword

As the nature decorates itself with its various beautiful colours during the spring, we, the members of Society of Photographers take this opportunity to welcome you all at this colourful opening function of our 6th Howrah Colour Salon.

We will now present before you our 6th International Colour Slide exhibition. Before projection of the selected slides I will try to unveil the herculean task and tremendous odds behind the colourful curtain. This year also we have received worthy response from artists-photographers from all over the world. I do hope all of you will enjoy the colourful and aesthetic creation of distinguished photographers from different corners of the globe.

In spite of the tremendous scarcity of photographic materials and the far reaching value of photographic goods in our country the salon statistics shows an encouraging trend. A large number of entries have been submitted by the pictorialists from all parts of our country indicating that they are becoming more and more conscious in expressing the aesthetic minds as well as making great effort for survival of pictorialism. I congratulate them for this enthusiastic effort and joint support which have given the final shape to this pictorial salon. I also sincerely hope the standard and quality of the selected work would satisfy the spectators.

In this connection, I would like to express my sincerest thanks to Messrs B. K. Sinha, Benu Sen, ARPS., EFIAP., ANPAS and Subroto Ray, ARPS., EFIAP for their kindness in selecting the slides.

Once again, I wish to renew our thanks to the entrants, donors, patrons, advertisers, authority of the Howrah Medical Club, the press and the All India Radio, Calcutta, for their valuable service and co-operation. I also express my special thanks to Sm. B. Ghosh for lending her voice in the commentary.

In fine, I shall be failing in my duties if I do not extend my thanks to the Executive Committee, general members and in particular the Salon Committee of our society for their tireless efforts in making this Salon a great success.

ARABINDA DEY

Sign your own peace treaty

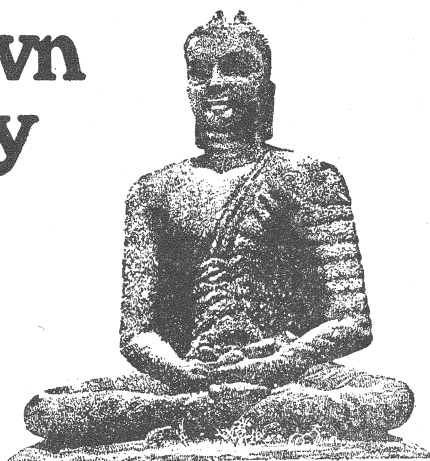

Here at Santiniketan

Far from the madding crowd. To peace and serenity. Where nature is still nature. Pure. Unspoiled. Way out of this world.

Yes, come to Tagore's Santiniketan for a happy, peaceful break. See his manuscripts...paintings...the Nobel prize...and his 'niketan'. And between Uttarayan, Kalabhavana and Ram Kinkar's

sculptures that abound everywhere and the festivals, dance and drama, you'd know why Santiniketan is a meaningful synthesis between modernity and the tradition of India.

Come, discover Santiniketan for yourself. And do please make your stay pleasant by staying either at the Tourist Lodge or Tourist Cottages.

How 2 rooms of valuable records became 3 small cabinets at the Bank of America (and how KODAK can help you)

Everyday, the Bank of America receives cheques, statements, letters and deeds. But there's no piling up of paper. The Kodak Microfilmer records everything in less time than it takes to read it!

Locating documents is finger-tip easy too, with a Kodak Microfilm Reader. And you can also keep extra copies of everything, in case one set is lost.

Ask Kodak to help you handle and retrieve data of all kinds faster and more economically.

Microfilming is only one area of activity for Kodak. Others include amateur photography, industrial radiography, motion-pictures, business equipment, scientific and instrumentation products.

Kodak Limited
